

We're Making Our Mark on the World... **BY BEING GREEN.**

By becoming a member of EPA's SmartWay Transport Partnership, we are ensuring we leave less of a carbon footprint on the planet.

SmartWay is a collaboration between the USEPA and the freight industry to help:

- Reduce fuel costs
- Improve areas that need to be more efficient
- Demonstrate efficiency to potential customers
- And most importantly, increase environmental performance

As a member of SmartWay, we have agreed to assess freight operations, calculate fuel efficiency and carbon footprint and track fuel-efficiency and emission reductions annually. To help achieve these goals, NTC has made changes by:

- Using synthetic lubricants and greases
- Improving engine efficiency with fuel additives
- Setting speed limits and idle times on our equipment
- Purchasing more aerodynamic trucks with deflection shields
- Using battery operated night systems
